

Certifications and Green Initiatives

ARE MEDALLION® CABINETS KCMA CERTIFIED?

- KMCA is a product performance standard for the cabinet industry.
- Medallion cabinets are KCMA compliant and certified.
- For more information visit the KCMA website at www.kcma.org

ARE MEDALLION CABINETS ESP CERTIFIED?

- ESP, Environmental Stewardship Program, is a product sustainability certification for the cabinet industry.
- Medallion cabinets are ESP compliant and certified.
- For more information on ESP visit www.greencabinetsource.org.

ARE MEDALLION CABINETS LEED® CERTIFIED?

- Medallion is a responsible manufacturer utilizing sustainable processes that may contribute towards LEED points.
- Buildings can obtain LEED certification by using products that contribute LEED points.
- Visit the U.S. Green Building Council website for more details at <http://www.usgbc.org>.

ARE MEDALLION CABINETS FSC CERTIFIED?

- There are more than 50 forest certification programs available worldwide.
- Some of the woods Medallion uses are SFI certified rather than FSC.
- SFI values include protection of biodiversity, species at risk and wildlife habitat, sustainable harvest levels, protection of water quality and prompt regeneration.
- Visit the SFI website for more details at <http://www.sfiprogram.org>.

ARE MEDALLION CABINETS CARB COMPLIANT?

- The California Air Resource Board sets and manages standards for air quality including formaldehyde emissions from composite wood panels.
- Medallion cabinets are manufactured from CARB compliant and certified materials.

Medallion®
an ELKAY company

PARTNERING FOR A GREENER FUTURE

Medallion Cabinetry is committed to contributing to our planet's long-term well-being so future generations can experience the magnificence of trees in nature and in their homes through beautiful cabinetry. We are an exclusive partner in the Arbor Day Foundation's Give-A-Tree® card program.

- A tree is planted in a national forest, in the name of the customer, for EVERY kitchen ordered.
- Our national forests are home to such noble creatures as lynx, grizzly bears, wolves, bald eagles, trumpeter swans, and hundreds of other species. These forests are in desperate need of replanting due to recent unprecedented fires.

ARE MEDALLION PRODUCTS MADE IN THE USA?

- Medallion cabinets are manufactured by Elkay. Like your family, the Elkay family has values and traditions that endure. For almost a century, Elkay has been an American-owned and operated company, providing thousands of jobs that support our families and communities.
- All assembly is done in the USA using domestic plywoods. Your purchase of Medallion products helps create jobs here at home.

DOES MEDALLION USE FORMALDEHYDE?

- Medallion makes a difference with our products by partnering with suppliers to ensure continued environmental stewardship. We select materials manufactured to meet or surpass current regulatory requirements, including low formaldehyde emissions.
- All of the wood we use complies with CARB formaldehyde emission standards.

ARE MEDALLION CABINETS GREEN?

- Our products are KCMA and ESP certified which means our materials and processes are qualified accordingly.
- Our paint curing ovens utilize the latest in light technology making them 50 percent more efficient than conventional gas ovens.
- All sawdust and wood shavings generated in our manufacturing process are recovered through a filtration system, removing 99.99 percent of dust particles. This eliminates virtually any discharge of wood dust into the atmosphere and it returns warm air back into the factory, conserving energy.
- The air filtration system in our paint department removes 99.97 percent of particulate matter, keeping our air clean inside and out.
- By deploying these innovative technologies in our facilities, we've dramatically changed the way wood finishes are prepared for application which helps reduce waste by minimizing disposal of unused material.
- Our enhanced styrofoam corner protectors are made from ARCEL resin which can be recycled at your local recycling center that accepts EPS foam (SPI code #6 polystyrene PS).
